REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Battey et al (US 4,717,806), Kitamoto et al (US 4,626,315), Hori et al (US 5,445,710), Huang et al (US 6,326,574), and Kinnard et al (US 6,259,072).

The following is an examiner's statement of reasons for allowance: allowance of claims 1-2 is indicated because the prior art of record does not show or fairly suggest a method of removing photoresist from a wafer, wherein the wafer is heated to a temperature between 210°C to 230 °C and the plasma is produced in the process chamber only when the heated wafer has been raised above the upper surface of the wafer support or stage so that the plasma removes any photoresist all at the same time from the front, side, and rear surfaces of the wafer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
